

Princeton Electric Plant Board
Customer-Owned Renewable Energy (CORE) Policy
Summary

- The maximum installed renewable generation capacity for industrial, commercial, and residential customers is **thirty kilowatts (30 kW)** per metered location.
- The Customer-Owned Renewable Energy (CORE) Policy is a Buy-All Sell-All Policy.
- The customer's complete electric energy requirements shall be purchased from Princeton Electric Plant Board (PEPB) through a separate meter and billed in accordance with PEPB's Rate Schedule.
- The customer's renewable electric generation facility shall be metered separately, and all generated electricity shall be purchased by PEPB at an annually calculated wholesale energy cost (the CORE Generation Reimbursement Credit). Any available credit will be applied to the customer's account each billing period.
